

Household Account Checklist

If a loss of a loved one occurred today, would you be able to locate the needed financial accounts, insurance information, assets, websites, logins and passwords required to deal with their estate? If your records were lost due to any of the natural disasters happening around us, would you be able to remember and reconstruct everything you have? Having a record of this information is crucial for you and your loved ones. It is your peace of mind. It is your life. From how you pay your bills, to accessing your personal information to where you shop. Recording the details of your life is crucial. This checklist is meant to help you do that.

While this is not a complete listing, use this checklist as your guide to help you consider the items and information that should be recorded.
